

HOME THEATER

Simply put, a custom home theater is a high-quality audio and video entertainment system. It is designed to create a movie experience in your own home – immersing you right into a movie.

Mulholland Audio Video designs and fabricates custom theaters from the ground up, creating an authentic movie theater that can be as elaborate or as simple as you wish. We can start from scratch or work with your existing room, taking great care to blend in with the decor.

Mulholland Audio Video has the facilities to work with your architect, designer, or builder, providing them with detailed blueprints that incorporate our equipment into your plans. This service also gives the client a permanent record of their wiring.

COMPANY HISTORY

Incorporated in 1956, Mulholland Audio Video is a family-owned and -operated business. We design, sell and install custom commercial and residential audio video systems, including home automation, WIFI and networking upgrades, home theaters, whole home audio, lighting control, landscape lighting, security cameras and total home integration.

We also provide your business with the latest technology in boardrooms and conference rooms, as well as commercial music systems. Fully licensed in Rhode Island and Massachusetts, we pride ourselves on being a full-service professional company. Our technicians are manufacturer trained and have stringent requirements in the areas of equipment, knowledge, training, and experience.

Our commitment to our clients does not end with the initial purchase and installation. Our technicians are available for orientation, questions, and advice. Our in-store displays allow you to experience home theater, whole house audio, security cameras and more. Mulholland Audio Video works with your architect, designer, or builder – providing them with detailed blueprints that incorporate our equipment into your plans. This service also gives you – the client – a permanent record of your wiring.

HOME AUTOMATION

Introducing the Elan Home Automation System – a family of products designed to provide more convenience, comfort, and peace-of-mind than you ever thought possible.

Personalized to fit your specific lifestyle, these solutions range from simple family room control to full whole-home entertainment and management – even remote monitoring of vacation homes. And best of all, with Elan – whether you're moving around the room or around the globe – the system is just as easy to use. Thanks to its uniform look and feel, no matter what Elan interface you touch, it will simply feel like home.

VIDEO SECURITY

Security cameras are fast becoming an important necessity in everyday life for homes and businesses. Whether it is general security of your family, monitoring the children in the yard or recalling past recorded events, security cameras are a valuable solution to your security needs at home. For businesses, they can help monitor employee productivity, customer activity, preventing theft.

However, a security camera system is only as good as the system design. Proper design is more important than ever with systems now featuring AI for distinguishing the difference between vehicles and people, night-vision, remote viewing, and large storage NVR hard drives.

Mulholland Audio Video will design and install a security camera system customized to your specifications.

WHOLE HOME AUDIO

Whole home music is having a central system that delivers high-quality music throughout your home. However, it goes so much further than that. A whole home music system gives you the ability to play all of your favorite music from various sources; i.e. satellite radio, as well as Internet streaming music sources such as Spotify and Pandora.

Today's whole home music systems allow you to play different sources in different rooms at the same time. Your kids can be listening to their music in the family room while you listen to your favorite tunes on the deck. You can now control your music system with your mobile device, hand-held controllers or traditional in-wall in-wall touch screens.

LANDSCAPE LIGHTING

Mulholland Audio Video offers Coastal Source Lighting products as we have found them to provide durable solutions for breathtaking outdoor environments. Adding lights to outdoor spaces can improve your overall home experience. Transform your yard, porch, patio, deck, pool area, or highlight architectural features throughout your property. Landscape Lighting emphasizes the best of your home or business landscape has and highlights your architectural features, plantings, and hardscape features. Giving your home or business curb appeal even at night.

LIGHTING CONTROL

Lighting control is the ability to control and monitor all the lights in your home while either at home or away. Easily control your lights with the touch of one button using keypads, smartphones, and iPads. Pre-set scenes and timers are designed to use your lights more efficiently and will save money every month.

WIFI

Upgrade your speed and coverage and get high performance, blazing fast internet for your home or small business. Mulholland Audio Video provides WIFI upgrades and installation services to homeowners and small businesses in Rhode Island and Massachusetts in the Southern New England area.
